

Martin L. Sage
Publications since 1978

"Isotope Effects in the High-Overtone Spectrum of C-H Stretches in HCN", *Isr. J. Chem.* 44, 37 (2004).

"Comparison of the Morse and Deng-Fan Potentials for X-H bonds in small molecules", *Z. Rong, H. G. Kjaergaard, Mol. Phys.*, 101, 2285 (2003).

"Vapor Pressure", M. L. Sage and G. W. Sage, in *Handbook of Property Estimation Methods for Chemicals: Environmental Health Sciences*, D. Mackay and R. S. Boethling, eds., CRC Press (Boca Raton, 2000)

"Modelling and calculation of dipole moment functions for XH bonds", C. D. Daub, B. R. Henry, M. L. Sage, and H. G. Kjaergaard, *Can. J. of Chem.*, *Can. J. Chem.* 77, 1775-1781 (1999)

"Calculation of vibrational fundamental and overtone band intensities in H₂O", H. G. Kjaergaard, B. R. Henry, H. Wei, S. Lefebvre, T. Carrington, Jr., O. S. Mortensen, and M. L. Sage, *J. Chem. Phys.* 100, 6228 (1994).

"Quark mass hierarchies from universal seesaw mechanism", A. Davidson, L. Michel, M. L. Sage, and K. C. Wali, *Phys. Rev. D* 49, 1378 (1994).

"Calculation of vibrational fundamental and overtone band intensities in H₂O", H. G. Kjaergaard, B. R. Henry, H. Wei, S. Lefebvre, T. Carrington Jr., O. S. Mortensen, and M. L. Sage, *J. Chem. Phys.* 100, 6228 (1994).

"Large amplitude vibrations in triatomic molecules: a new approach", *J. Phys. Chem.* 98, 3317 (1994).

"Irradiation of food: bane or boon?", M. L. Sage, *Bull. of Sci. Tech. Soc.* 14, 13 (1994).

"Science, technology, and political choice: part of the undergraduate curriculum", *Bull. Sci. Tech. Soc.* 12, 220 (1992).

"Applications of computer algebra to molecular spectroscopy", M. L. Sage, *J. Mol. Struct.*, 223, 407 (1990).

"The quantum Henon-Heiles problem with coriolis coupling: a comparison of algebraic and exact results", M. L. Sage and Mark S. Child, *J. Chem. Phys.*, 90, 7257 (1989).

"An algebraic treatment of quantum vibrations using REDUCE", M. L. Sage, *J. Symbolic Computation*, 5, 377- 384 (1988).

"Multiphoton excitation of bond modes", M. L. Sage, in Atomic and Molecular Processes with Short Intense Laser Pulses, p. 441, A. Bandrauk ed., Plenum, New York, 1988.

"Large amplitude bending vibrations of the triatomic molecule: low angular momentum states", M. L. Sage, J. Chem. Phys. 84, 1565 (1986).

"The coupling between intramolecular and intermolecular motions in large van der Waals complexes", M. L. Sage and J. Jortner, J. Chem. Phys. 82, 5437 (1985).

"The coupling of a large amplitude stretch with a bending vibration", M. L. Sage, Chem. Phys. 93, 453 (1985).

"Improving on the conventional presentation of molecular vibrations: advantages of the pseudoharmonic potential and the direct construction of potential energy curves", M. L. Sage and J. Goodisman, Am. J. of Phys. 53, 350 (1985).

"The vibrations and rotations of the pseudogaussian oscillator", M. L. Sage, Chem. Phys. 87, 431 (1984).

"High overtone C-H and O-H transitions in gaseous methanol: theory", M. L. Sage. J. Chem. Phys. 80, 2872 (1984).

"Energetics, wavefunctions, and spectroscopy of coupled anharmonic oscillators", M. L. Sage and J. A. Williams III, J. Chem. Phys. 78, 1348 (1983).

"Two photon excitation of bond modes", M. L. Sage and J. Jortner, Chem. Phys. 72, 249 (1982).

"The dynamics of intramolecularly coupled local modes", M. L. Sage, in Intramolecular Dynamics, p. 129, J. Jortner and B. Pullman ed., D. Reidel, Dordrecht, (1982).

"Application of the Magnus expansion for high order multiphoton excitation", I. Schek, J. Jortner, and M. L. Sage, Chem. Phys. 59, 11 (1981).

"Bond modes", M. L. Sage and J. Jortner, in Photoselective Chemistry, Part I, p. 293, J. Jortner ed., John Wiley, New York, 1981.

"Cooperative excitation of bond modes", M. L. Sage and J. Jortner, Chem. Phys. Lett. 79, 9 (1981).

"Validity of the rotating wave approximation for high-order molecular multiphoton processes", I. Schek, M. L. Sage and J. Jortner, Chem. Phys. Lett. 63, 230 (1979).

"Effect of bending vibrations on the high overtone spectrum of the CflH bond mode in C6D5H", M. L. Sage, J. Phys. Chem. 83, 1455 (1979).

"Computation of a class of 3j-coefficients", M. L. Sage and K. C. Wali, J. Math. Phys. 20, 393 (1979).

"A theoretical analysis of magnetic circular dichroism of the $7F_0$ $5D_1$ and $7F_1$ $5D_0$ transitions in solutions of EuCl_3 ", M. L. Sage, M. H. Buonocore and H. S. Pink, Chem. Phys. 36, 171 (1979).

"Morse oscillator transition probabilities for molecular bond modes", M. L. Sage, Chem. Phys. 35, 375 (1978).
